

### Covid Vaccination Invite Text

We will be sending texts to patients to invite them for the Covid vaccination; the message will roughly look like this. We are using text messages to inform patients of appointments as sometimes we receive the information of appointment availability at short notice. Our text message will also include your unique NHS number which will be needed for booking your appointment.

It will come from this sender, which is the same as when you receive any text messages for appointment reminders from the practice. The email address listed above is a generic unmanned email address used solely to send the text messages.

The link included <https://bit.ly/YMGCovid> is a shortened web link to make sure we can fit it all in to our text message and will take you to York Medical Group Page. We use both nhs.uk and co.uk web pages. Please read the information on this page carefully as it has information to help you book and where to get help if needed.

Please click on the booking link which will take you the page below, click on patient bookings to make an appointment or amend/cancel an existing appointment if you need to do so. Please only attempt to book an appointment if you have received an invite to do so.

Please complete the booking form. You will need to complete with the information requested and if you need support we have added some useful information on our web page.

We apologise if you have issues with the booking website, unfortunately it is not managed by York Medical Group and is run by the Mass Vaccination service, if there are issues please contact them at [nimbuscare.help.desk@nhs.net](mailto:nimbuscare.help.desk@nhs.net)
